apptify.me

The Wait is Over.

PRODUCT FEATURES

App-Pointment Scheduler will salve time by integrating reservations from your app and website with your current scheduler and appointment system

Sms Code Verification Against Spam

Never worry about Spam Appointments.

Each appointment uses a unique SMS verification code

This confirms that your customers are real persons.

PRODUCT FEATURES

App-Pointment Scheduler will salve time by integrating reservations from your app and website with your current scheduler and appointment system

Upcoming Bookings Under Control

Receive an email and an SMS text every time someone makes a new reservation.

Even your staff will be notified by e-mail and SMS if someone has chosen some of your assistants.

PRODUCT FEATURES

App-Pointment Scheduler will salve time by integrating reservations from your app and website with your current scheduler and appointment system

Booking Confirmation

Your booking is confirmed ✓

Booking number

23150

ℹ️ If you need to change your reservation please call the **003393293520440** or send an e-mail to bobbyshop@email.com

Pay €17.50 as a deposit with Paypal   Or   I'll pay later

Accept Full Or Partial Payments

You can accept payments from your app or website by asking your customers for full upfront payment or a percent of the total amount as a deposit.

PRODUCT FEATURES

Two Powerful Bookings Engines

A "Basic" one with standard session duration. Or "Advanced" that sums the duration of the services booked by the customer.

Update Services And Staff

Set as many services as you want. For each of them you can set a duration, a price and days Off. Do the same with your staff members.

Take Notes Of A Manual Or Phone Reservation

Add new bookings inside our platform easily and have realtime control if the desired date and time is actually free to be reserved.
