

premiere

Start winning projects immediately with a mobile application that shows and sells your work. Gain a competitive advantage and keep it, over other contractors.

Ideal for Tradesman, Construction & Home Services

apptify premiere

The Appture Premier shows you are a professional from the launch to the content throughout the app. Appture Premier apps are an essential part of the mobile marketing platform used by medium sized businesses in service, retail, trade associations and publishing. Whether a TV or Radio station or a municipality, ease of use and flexibility will impress both administrators and the audience.

If you're starting the search for a mobile app platform, your search starts with Apptify Premier.

Mobile is everywhere and is changing everything in the digital domain. For example, people use apps more than watch TV (198 min vs. 168 min per day/ TechCrunch)

And that use has pushed mobile app advertising revenue hit \$31 billion in 2015, up from \$23 billion in 2014 (tech crunch)

Something so small has big impact. People are spending more time on apps than they are watching TV (3.3 hours per day on apps compared to 2.8 hours for TV)

In fact, 67% of Americans check their smartphone even when they don't get a text, push notification or alert (PEW Research Center).

If you haven't made the commitment to mobile, your competitors are because 92% of organizations see getting a mobile app as a way to gain a competitive advantage (Vanson Bourne Study)

A mobile user's entire app journey can happen in a matter of moments — sometimes in less than a minute. Think about this scenario:

You're commuting, reading an article about a new cruise. Curious, you search for the company mentioned, and soon enough you're emailing to receive more information and potentially plan your trip.

This mobile moment happened on a whim, and in seconds, went from introduction to potential sale.

At Appture, we focus on building end-to-end systems centered around technology and consumer engagement. Turning concepts into cash registers, impressions into engagement and campaigns into concrete results. We use our own technology to your advantage, and build intelligent brand experiences for our clients that deliver on promises and on budget.

Highlight Your Business On Every Page

Works On Android and Apple Tablets, Phones

Customize Your Header Bar From Thousands Of Designs and Flash Animation
